Work Experience

Senior Mobile Application Developer (Flutter)

Al Farabi - Riyadh

April 2023 to Present

Working as an app developer for Farabi Clinics(located in KSA). I have developed their main customer app which is live on play store and app store, it allows users to see nearby hospitals, book an appointment and also allows users to create any feedback or complaints they might have. This app has multiple payment gateways that include Apple Pay, Stc Pay, Tabby and Tamara. Also working on providing maintenance services for the main customer app. Along with that, also working on doctors app which allows doctors to manage their apointments and availability.

Mobile Application Developer (Flutter + Android)

Safarifone - Islamabad

February 2022 to April 2023

Worked primarily as flutter app developer along with additional role of spring boot developer and native android app developer using jetpack compose.

Workled on product in whcih native android app built in kotlin jetpack compose used to call an API developed in Spring boot and deployed on raspberryPi, that spring boot server was then responsible for communicating with vending machine hardware and vend items physically using hardware programming in java and return response back as API response.

Stock management of the vending machine was handled via management app developed in flutter.

Flutter + Android Developer

Infusible Coders - Kohat

September 2019 to February 2022

Worked as a native android and flutter developer and worked on variety of apps mainly using google maps, InApp payments, stripe, REST APIs, Firebase services
